100 % BIODEGRADABLE

In contrast to synthetic fibers, wool is a natural and renewable resource. When wool is disposed of, it will decompose and release valuable nutrients back into the earth within a matter of months.

* Eco wool means that the breeding and handling of wool must meet specific requirements. No trace of pesticides are allowed in the wool. The animals must be given only natural food and the use of antibiotics is strictly regulated.

PURE NATURAL

Our mission is to leave as few imprints on the planet as possible, which is why we only use 100 % natural materials. We carefully follow each step our products take and look for the most climate smart way of working in our own OEKO-TEX® certified factory.
